Day 1 blank

Day 2 → learn about python & A*
& what is A* & how is ~~matplot~~
~~matplot~~ lib works & what is it

Day 3 → more on A* algo ~~and~~ & manhattan
distance heuristic
→ Watched how to dual boot ubuntu
didn't had a pen drive

Day - 4/5 → ① wrote python script (~~some~~ ^{half} using ai)
② downloaded rufus & ubuntu 22.04
③ code did work but matplotlib
didn't work in vs code so had
to use terminal & plotted images
(Test)

④ did disk partition & dual
booted windows & linux successfully
(ubuntu)

problem → the windows got locked by bitlocker
so had trouble finding 4-digit key & it
asked it every time switching to windows
so disabled bitlocker

→ after that i had ~~very~~ almost no
time ~~to do checkpoint 1, 2~~ so
tried my best to do checkpoint 1, 2
